

Heuchera rubescens

Alumroot

Saxifragaceae

Exposure Sun or part shade

Water Regular water

Form Perennial

Height 6 inches

Flower color White

Bloom time Spring

This is one of the smaller alum roots from rocky areas at high elevation and is well suited to rock gardens and containers. The small flowers are white but the calyx is often red, giving the inflorescence an overall pink appearance. Needs good drainage.

Habitat Dry rocky areas above 4500 feet
