

Iris - Pacific Coast Hybrids

Pacific Coast Iris

Iridaceae

Exposure Sun or part shade

Water Occasional water

Form Perennial

Height 18 inches

Flower color Various

Bloom time Spring

Pacific Coast Iris are the result of many years of hybridization of native species including *Iris douglasiana*, *I. innominata*, and *I. munzii*. They come in a wide range of colors from white through yellow to purple and maroon and include bicolors. Some have ruffled petals. They have been selected for garden tolerance and are among the easiest iris to grow.
