

Keckiella cordifolia

Bush Snapdragon

Scrophulariaceae

Exposure Sun or part shade

Water Occasional water

Form Deciduous shrub

Height 5 feet

Flower color Red

Bloom time Spring or summer

Keckiellas are shrubby penstemons. This one has numerous narrow red flowers. It is adaptable to various amounts of sun and water, but too much water shortens its life. When grown in part shade it forms a lax shrub that will twine through neighboring plants. In the sun it will be a more compact bush. Give it good drainage.

Habitat Canyons, chaparral
