

# *Symphoricarpos albus* var. *laevigatus*

Snowberry

Caprifoliaceae

<b>Exposure</b>	Partial shade
<b>Water</b>	Occasional water
<b>Form</b>	Deciduous shrub
<b>Height</b>	5 feet
<b>Flower color</b>	White tinged pink
<b>Bloom time</b>	Spring

Snowberry is a thicket-forming shrub with small flowers followed by distinctive white berries. It is best naturalized in a woodland garden where it provides food and cover for wildlife. Birds eat the berries. Good under oaks.

**Habitat** Woods, north slopes

**Warning** Berries may be **poisonous**
