

Triteleia ixioides

Liliaceae

Exposure	Sun or part shade
Water	No summer water
Form	Bulb
Height	1 foot
Flower color	Yellow
Bloom time	Spring

This small bulb has bright yellow flowers in loose clusters. It can be grown in a summer dry rock garden resembling the steep slopes where it grows in nature. It can also be grown massed in a container, which can be stored in the shade when bloom is over. In either case it needs sandy soil and good drainage.

Habitat Forest and woodland edges
