

Vancouveria chrysantha

Siskiyou Inside-out Flower

Berberidaceae

Exposure	Shade
Water	Regular water
Form	Perennial
Height	1 foot
Flower color	Yellow
Bloom time	Spring

Siskiyou inside-out flower is uncommon in the wild and rarely seen in cultivation. It is the most colorful and most challenging of the Vancouverias. Small bright yellow 6-petaled flowers stand above the clumps of angular leaflets on thin wiry stems. Vancouveria makes a slow growing ground cover for a shade garden or a nice specimen for a container. Needs good drainage.

Habitat Dry sites, chaparral, coniferous forests
