Prez Sez

Linda Brodman

I have a fondness for dragonflies. Recently, I read that a remarkable number of their species travel up and down the latitudes to reproduce, migrating great distances. In many cultures, the dragonfly can symbolize various things — to name a few — poise, respect, and power.

In October, we will be gathering for our first (in-person) public event since January 2020, followed by our Chapter's (in-person) fall native plant sale at the Arboretum. We hope to see you there! I want to pay special recognition and many thanks to Julia Davenport who has managed our sales for several years, and will be resigning from our Board at the end of the year. Julia manifests an unassuming leadership style with poise, effortlessly volunteers, and takes on other tasks to support our Chapter’s goals. Our Chapter’s plant sales have run smoothly for years under her guidance and team work. Thank you, Julia.

On a sad note, in July we lost a highly respected and inspirational restorationist, Ken Moore. He was an early mover and shaker with the beginning years of the California Invasive Plant Council, and was well known throughout most of California. Ken started his life’s work many years ago convincing people that non-native, invasive plant species needed to be dealt with or our native plants and habitats would truly suffer great losses. Many volunteers (including myself) owe a deep gratitude from learning how to

Fall Plant Sale LIVE!

Saturday October 16, 10:00am members only, 11:00am general public. Special Guest Speaker at 11:30. Sale ends at 3:00pm. UCSC Arboretum and Botanic Garden

Get ready to plant your garden for the fall. Whatever your garden conditions, you will find a plant at our sale. If needed, able native plant experts will assist you.

We are happy to report that we can again meet in person, outside and following social distancing guidelines. Masks optional but recommended. Held at our usual spot, the upper parking area of the UCSC Arboretum and Botanic Garden. This will be my last sale as Plant Sale Board Chair. I have learned much, but it is time to pass on the learning opportunity to the next chair. Which could be you! If you are interested in working with a wonderful group of people, enjoy the challenge of organizing a public event, and want to support our chapter, this is a dream job. We have two plant sales a year, spring and fall. Interested? Contact Linda Brodman, redwdrn@pacbell.net. We can all do better to help support a healthy planet. This is a good place to start.

What’s For Sale?

Kari Olsen, Lead Propagator

We have a fabulous selection of California natives lined up for this sale, featuring plants from our local area and the central coast region, ready to brighten local gardens. Remember, fall is the ideal time planting time for California natives. The minute fall rains arrive, seeds begin to germinate, young plants put down healthy roots, and many mature plants don’t even wait for spring to set about blooming!

The fall plant sale will feature over one hundred species of native plants, many of which are new offerings for our chapter including several Ceanothus, Fremontodendron, and Arctostaphylos cultivars. We will also be offering SIX species of Erionogon—pollinator superstars—as well as lots of plants in our most popular genera: Salvia, Diplacus, Epilobium, Achillea, Grindelia, and Frangula!

Here are just a few of our volunteer propagators’ favorites.

Diplacus (syn. Mimulus) ‘Fiesta Marigold’ This monkeyflower hybrid was developed and brought to the horticulture trade by the late plant breeder Richard Persoff who worked with this genus for decades. His mission was to develop garden-tolerant monkeyflowers which are less sticky and brittle and which tolerate garden watering regimes without sacrificing any of drought-tolerant qualities. He also selected for larger flowers, brighter colors and more sturdy plants. He left an extraordinary legacy of plants and ‘Fiesta Marigold’ is the cream of his crop!

Eriogonum grande var. rubescens What buckwheat don’t we love? All Eriogonum species are amazing pollinator plants as well as garden stars during the later summer months when other natives may be sleeping through their summer dormancy. This showy Eriogonum bears clusters of tiny red flowers in “pom poms” over clumps of silvery basal leaves.

Salvia ‘Aromas’ Do you love California’s salvias but lack the garden square footage to dedicate to their large space needs? Salvia ‘Aromas’ is the perfect solution! This hybrid of S. clevelandii and S. leucophylla retains the aromatic grey green foliage and attractive purple/blue flower whorls of its parents but grows only to about 4’ x 4’ making it an excellent small garden choice. The bees, butterflies, and hummingbirds will thank you for adding Salvia ‘Aromas’ to your garden.

Erigeron glaucus ‘Ron’s Pink’ and ‘Cape Sebastian’ Two horticultural selections of our familiar coastal Seaside Daisy both of which are very tolerant of the clay soils many of us have in our gardens. ‘Ron’s Pink’ blooms profusely from spring through summer bearing larger, decidedly pinker flowers than we see growing wild along our coastal bluffs. ‘Cape Sebastian’ is the most compact and lowest growing form of the Seaside Daisy cultivars but a powerhouse of lavender blooms spring through summer.

Heterotheca sessiliflora ssp. bolanderi ‘San Bruno Mountain’ – Looking for low maintenance long lasting bloomers? This Golden Aster doesn’t rest from flowering nonstop spring through fall. Like all Asters, a pollinator attractor as well as a splash of sunshine in the garden.

Check our website (cruzcnps.org) and Facebook group page (facebook.com/groups/439243822865465/) Photos clockwise from upper left: Diplacus (syn. Mimulus) ‘Fiesta Marigold’, Salvia ‘Aromas’, another diplacus, Jackie Pascoe sporting CNPS t-shirt for sale, limited sizes.
More Field Trips!

Quail Hollow Ranch Park
Sunday October 17 June 23. 9:30—12:30 (bring lunch)
Leader: Andy Werner

CNPS field trip at Quail Hollow Ranch Park (QHR) on Sunday, Oct 17 2021. Meet at QHR parking lot at 9:30am. Trip lasts until 12:30pm. Mileage around 3-31/2 miles with elevation gain of around 500 feet. There are hills and some sun exposure. The pace is slow to moderate with many stops. We will take some of the trails to see, talk about, and ID plants. We will also discuss the 20 years of restoration that is still ongoing.

At the end of the hike is an option to eat lunch together at the picnic tables under the big, beautiful oak next to the ranch house.

Participants limited to twelve. You must RSVP to Andy Werner, trip leader at apwerner44@gmail.com to reserve a spot. QHR is the crown jewel of SC County parks and if you have never been there you are in for a treat!

Prez Sez (continued from page 1)

protect our wildlands from invasive species, and carry on his legacy in our own efforts.

In honor of Ken Moore, our Chapter is a sponsor for Cal-IPC’s 30 year Anniversary Symposium, online October 26 – 29. This year’s program is Expanding Community to Protect Biodiversity. Learn more about the Symposium and sign up at www.cal-ipc.org/resources/symposium/

In conclusion, our Chapter continues to face challenges and change at the leadership level, and we hope to sustain services to our membership and community. However, we need your support and involvement to keep it going, and to be a powerful voice for California’s flora. Contact me if you are interested at 831-462-4041.

Robust Spineflower Update

Suzanne Schettler

CNPS has worked for a number of years to protect one of the last remaining populations of robust spineflower (Chorizanthe robusta). The site was set eventually aside for preservation as a condition for residential development. The site is along Branciforte Creek just inland from Highway One.

Management of the site appears to have benefitted the spineflower by removing trees and shrubs that were shading the open sunny habitat preferred by this and other spineflowers. Interpretive signs were installed with text and photos informing passersby about the preserve. Unfortunately, four of the five photos were of invasive non-native plants and not robust spineflower.

CNPS volunteers recently produced new photos to provide accurate information informing the public about the plant and the preserve. The signs should be in place by the end of this year.
Join the California Native Plant Society!

Your membership includes: *Fremontia* journal (twice yearly) filled with articles on all aspects of native plants; *Flora* magazine (quarterly) presenting statewide activities and schedules; and Chapter newsletter *The Cypress Cone* (quarterly).

Fill out the form below or visit the state CNPS website (www.cnps.org) to join or renew your membership online. State your chapter affiliation as the Santa Cruz County Chapter.

**Name:** ____________________________________________________________
**Address:** __________________________________________________________
**City, State, Zip:** ___________________________________________________
**Phone:** ____________________________________________________________
**Email:** ____________________________________________________________
**Chapter affiliation:** ________________________________________________

**Choose One:**
- Student/Fixed Income $25
- Individual $50
- Plant Lover $120 (two members)
- Supporter $500 (two members)
- Patron $1,000 (two members, plus Special Updates)
- Benefactor $2,500 (two members, plus Special Updates)
- Steward $5,000 (two members, plus Special Updates)
- Guardian $10,000 (two members, plus Special Updates)

Please make your check payable to CNPS and send to:
California Native Plant Society, Attn: Membership,
2707 K Street, Suite 1, Sacramento, CA 95816-5130

If you would like to receive your newsletter via email only, please contact Ann at anng@calcentral.com or log onto your CNPS account (cnps.org) to make the switch.

---

**CNPS is a 501(c)(3) Non-profit Organization dedicated to the preservation of California native flora**

CNPS has thirty-four chapters throughout the state and membership is open to all persons, professional and amateur, with an interest in California’s native plants and other activities such as natural history, botany, ecology, conservation, photography, drawing, hiking, and gardening.

Donations are tax-deductible and support special projects such as publication of the County Checklist and conservation activities that preserve important habitats and species in our area. You may earmark gifts for specific areas. Membership is tax deductible, minus $8 for the journal *Fremontia*, published two times per year. Make checks payable to CNPS and send to: Santa Cruz County Chapter CNPS, P.O. Box 1622, Santa Cruz, CA 95061. https://www.cruzcnps.org
